

還在用手指量皮帶張力 ??

## SKF 紅外線皮帶張力計 PHL FM10/400

特點：

- 精確測量皮帶張力
- 快速，可靠的量測數據
- 排除人為誤差
- 使用簡單方便
- 非接觸式測量
- 不受環境及噪音影響

量測品質

不正確的皮帶張力易造成：

軸承損壞，皮帶跳動及過熱，減短皮帶及機件壽命，能源耗損

**SKF 紅外線皮帶張力計**由手持數位量測計及光學感測器組成，以光學感應方式量測皮帶震動頻率，適用於時規皮帶、三角皮帶以及**動力傳送皮帶**等各種工業用皮帶，幫助您快速，可靠，精確的量測皮帶張力

# 皮帶張力計規格

## Measurement range

Frequency range ..... 10 to 400 Hz

## Measurement accuracy (準確度)

Below 100 Hz ..... ± 1 significant digit

Above 100 Hz ..... ± 1%

Belt mass input range ..... 0.001 to 9,990 kg/m

Belt span input range ..... 0.001 to 9.99 m

Maximum belt tension display ..... 9 990 N

(最大張力值) ..... 2 200 lb

## Environmental conditions 使用環境

Operating temperature (操作溫度) ..... +10 to +50 °C

Shipment and storage temp (儲存溫度) ..... -50 to +70 °C

Protection class ..... IP54

## Sensor (感測器)

Type ..... Infrared optical (紅外線光學感測器)

IR wavelength (波長) ..... 970 mm

Visible aiming beam ..... Narrow angle orange LED

Housing (外殼) ..... Machined aluminium (鋁制外殼)

Cable length (導線長度) ..... 1 m

## Power supply

Battery type (電池) ..... AA (MN1500) Alkaline only

Number (電池數量) ..... 4

Expected life (使用時間) ..... 20 hrs

Compartment location ..... Back of meter

## Optional rechargeable batteries (選配)

Battery type (電池) ..... AA (1 300 mAh minimum)

Charger ..... 12 to 15 V DC output

Socket/polarity ..... 3,5 mm positive centre
